CHANGE THE WAY YOU DO FUEL

FUEL TAX CREDIT REPORT

Within the transport industry, fuel is a major unavoidable expense, however, with the Australian Government's Fuel Tax Credits (FTC) you can claim a rebate on your fuel and put money back into your own pocket. The process of accurately calculating your FTC amount and ensuring compliance can be complex, time-consuming, and prone to inaccuracies. For this reason, many businesses have not been able to claim their full entitlement, until now...

OPTIMISE THE VALUE OF YOUR CLAIM AND ACHIEVE YOUR FULL ENTITLEMENT

Volvo Trucks' fleet management system, Dynafleet, has been partnered with Prism to provide you with a detailed analysis of your fuel report to get the most out of your FTC claim. The system now generates a Volvo Fuel Tax Credit Report, which uses Dynafleet's GPS tracking and existing fuel data to improve the quality, accuracy and efficiency of your FTC calculations and potential outcomes.*

Retrospective claims are also possible, on public or non-public roads, should you have 6 months of high frequency positioning data available. With the additional benefit of a 'no hardware install', the majority of Volvos are factory fitted with Dynafleet telematics hardware, making it easy to get started.

*Please note: This is not tax advice and should not be relied upon. Speak with a tax professional to ensure compliance regarding FTC claims.

OPTIMISES CLAIMS

Precision analysis of detailed Dynafleet data, combined with Prism's comprehensive mapping, ensure you have the potential to always claim your entitlement with the right evidence to substantiate the claim.

IMPROVES CASH FLOW

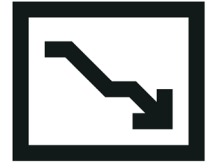

By streamlining your FTC analysis on a monthly basis, you can claim your entitlement at the earliest point in time, ensuring you maximise your cash flow opportunities.

SAVES TIME

Automation removes the need for manual work, saving you time while reducing the risk of errors. A low fixed charge added to your Dynafleet subscription, ensures you know your costs well in advance.

5 WAYS VOLVO'S FUEL TAX CREDIT REPORT HELPS YOU SAVE MORE THAN JUST FUEL...

- **MINIMISE** THE RISK OF ERRORS
- **REDUCE** ADMIN COST
- **OPTIMISE** THE VALUE OF YOUR CLAIM
- **IMPROVE** CLAIM ACCURACY
- **CAPITALISE** ON RETROSPECTIVE CLAIMS**

***Requires at least 6 months of high frequency positioning data prior to retrospective claim. Seek advise from a tax professional before submitting your claims. s*
